

# **American Le Mans Northeast Grand Prix**

**July 6 - 7, 2007**

**The fastest fliers through Big Bend all season are unquestionably the world-class machines that compete in the American Le Mans Series.**

**The American LeMans New England Grand Prix event is the first Stateside race for most of the teams returning from their triumph or Defeat at the famed 24 Hours of LeMans.**

**The all-conquering Audi R8 retired as a winner at LimeRock Park in 2006, but has been replaced by the eerily quiet but no less dominate TDE Diesel R10 in the leading LMP1 class. The lighter LMP2 class is quickly developing into a manufacturer's battleground, with Acura jumping in to fight Mazda and Penske's Porsches. Not all the action is with the prototypes, as the GT1 and GT2 classes are more than just moving chicanes for the prototypes, with Porsche hotshoes battling Corvettes and Aston Martins amongst Ferrari F430's and BMWs.**
